

The Wall Street Protocol Ultimate Checklist

ENTRY CRITERIA - ALL MUST BE TRUE ✓

1. Breakout Confirmation

- Price breaks above clear resistance zone (represented by 3 or more highs)
- Resistance zone validated by multiple prior touches
- Breakout is clean and decisive (not choppy)
- Check sector is in an uptrend! (don't go against the industry/sector trend)

2. Moving Average Conditions

- Price is above 50-day Moving Average
- 50-day MA is sloping upward
- Price is above 150-day Moving Average

3. Volume Analysis

- Breakout volume is at least 2x average of previous week
- Calculate: $(\text{Today's Volume} \div \text{5-day Average Volume}) \geq 2$

4. Mansfield Relative Strength

- Currently in uptrend OR
- Recently transitioned from negative to positive

EXIT RULES - ANY ONE TRIGGERS SALE ⚠

Initial Stop Loss Placement

- Identify closest prior reaction low

IF FOUND:

- Set stop just below this level

IF NOT FOUND:

- Calculate 4-6% below breakout price
- Round down to nearest whole number
- Set stop below this round number, eg for \$10, set the stop at \$9.75

Trend Line Management

1. Identify 3 Clear Points:
 - Point 1: _____
 - Point 2: _____
 - Point 3: _____
2. Once Trend Line Confirmed:
 - Move stop loss to 1 point below trend line for 50% of position
 - Keep original stop loss for remaining 50%

Hard Stop Rules

- Price drops below 150-day Moving Average = IMMEDIATE SELL
- Price breaches confirmed trend line = SELL 50% OF POSITION
- Original stop loss hit = SELL REMAINING POSITION

Pre-Trade Checklist

Risk Management

- Position size calculated (max 2% risk per trade)
- Stop loss level identified
- Potential profit target identified
- Risk:Reward ratio calculated (minimum 2:1)

Trade Documentation

- Screenshot chart with marked levels
- Record entry price and stop loss
- Note volume confirmation
- Document Mansfield RS reading

Weekly Monitoring

Price Action

- Above 50-day MA?
- Above 150-day MA?
- Trend line intact?

Volume

- Still showing institutional support?
- Any concerning volume patterns?

Stops

- Update trailing stops if needed
- Check trend line stops
- Verify 150-day MA location

Notes

- Never average down on losing positions
- Don't fight the market trend
- Stick to the rules - no exceptions
- Document every trade decision
- Review weekly performance

Remember: "Everyone is a genius until the market crashes..."

Protection of capital is priority #1!
